

Flask Deployment

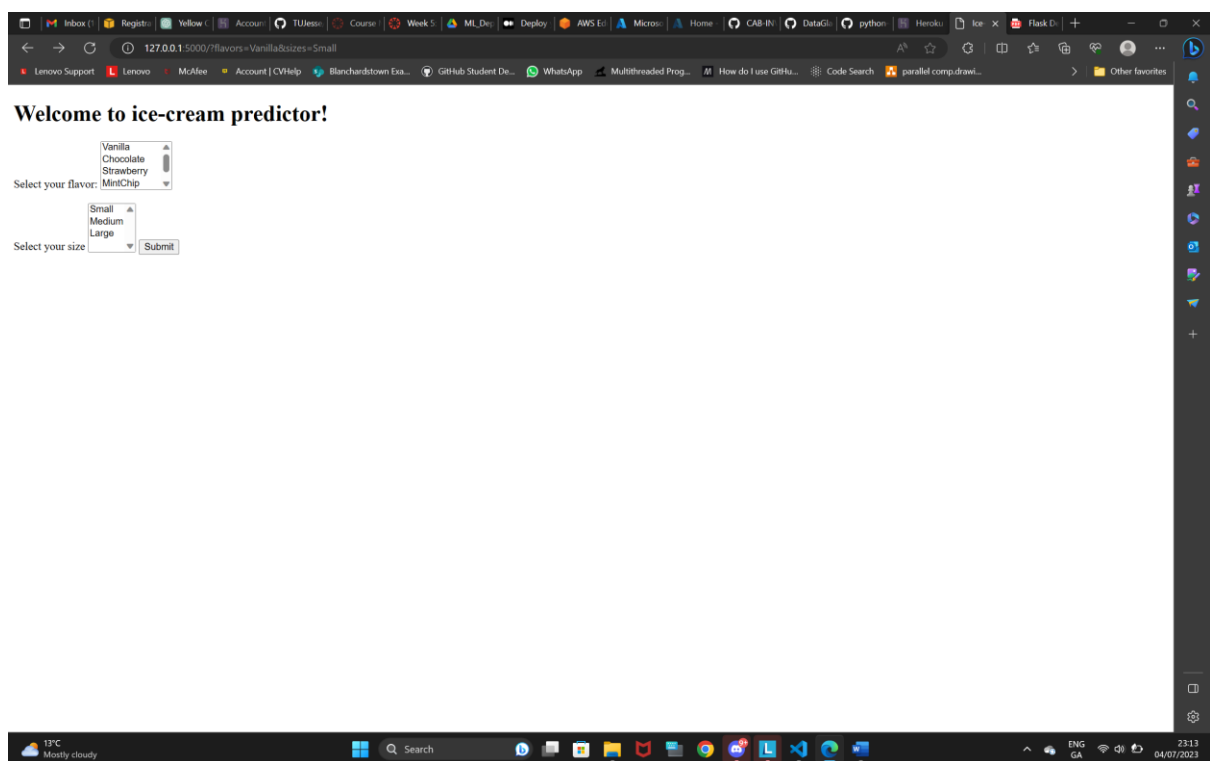

Name: Jesse Osuji

Internship Batch: LISUM22

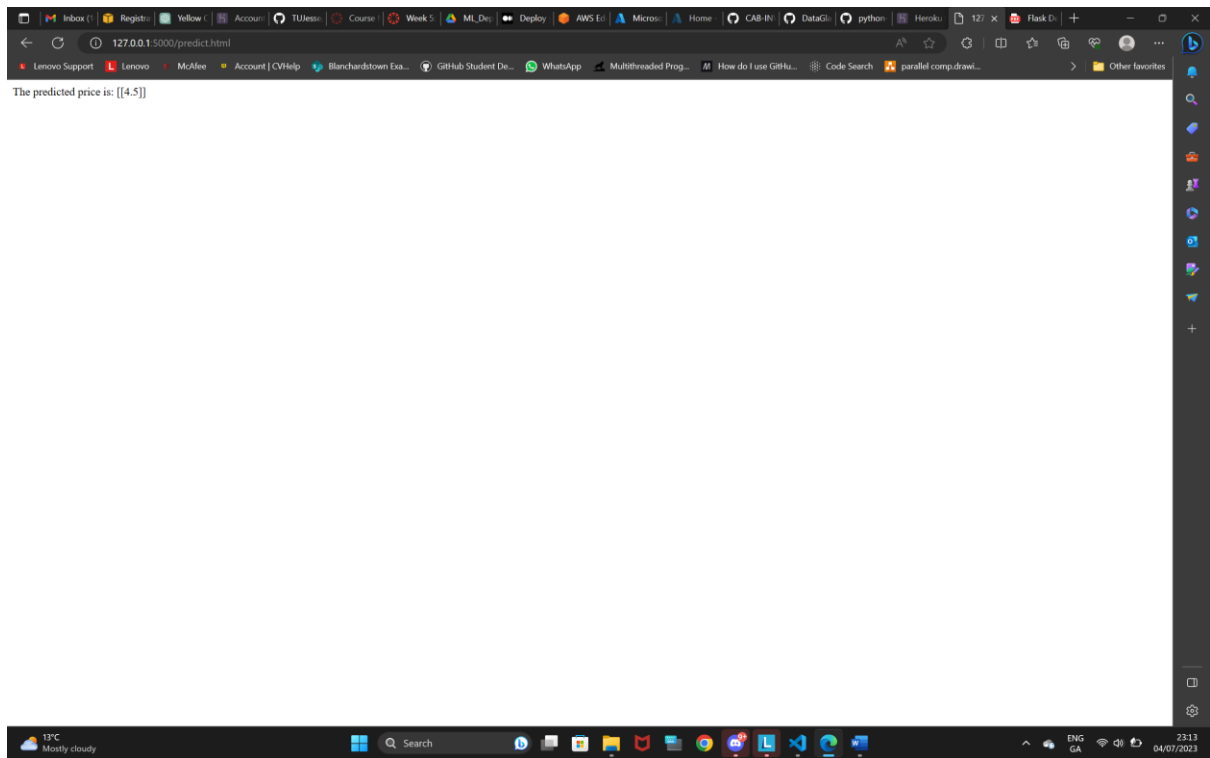

Submission date: 4th of July 2023

Submitted to: [TUJesse/Heroku_Deployment: Heroku deployment of flask program which has machine learning on a simple data model \(github.com\)](#)

There is a page that allows the user to select ice-cream size and flavour.

The price is predicted and given

The model was trained and then used. However Heroku wouldn't let me create an account as I was getting an error with the payment options that I didn't know how to fix.
